# ASHTON & BENTLEY

BEAUTIFUL BATHS INDIVIDUALLY CRAFTED

Welcome to Ashton & Bentley, one of the leading bath and basin manufacturers in the UK.

A second-generation family business, founded in 2007, our journey began as a bathroom restoration business with a passion for preserving the beauty of the past. Today we stand as innovators, blending traditional craftsmanship with contemporary elegance.

Our British factory manufactures our luxury bathroom designs allowing us to deliver exceptional craftsmanship and fulfil bespoke requirements. At Ashton & Bentley we bridge the gap between traditional time honoured skills and contemporary innovations to ensure we stand out in a world of mass produced items.

Our baths and basins may look effortlessly sleek, but they are meticulously crafted by skilled artisans in our British factory, taking up to 4 to 6 weeks for each bath. Made with precision each bath or basin comes with a 25 year guarantee.

What really sets us aside is our ability to transform your design with our range of finishes. From standard white to exclusive metallic and textured options, there's something from everyone.

Choose Ashton & Bentley to transform your next project into a sanctuary of indulgence where every detail speaks of enduring quality and sophistication.

# ASHTON AND BENTLEY: THE EPITOME OF LUXURY AND INNOVATION

**At the heart of Ashton and Bentley is a passion for creating extraordinary baths.**

Blending timeless elegance and modern innovation, Ashton and Bentley creates one-of-a-kind baths and basins that transform bathrooms into sanctuaries of relaxation and beauty. Available in exceptional finishes for a truly individual and high impact interior design scheme, our brand stands as a testament to luxury, sophistication, and unparalleled craftsmanship in the freestanding bath industry.

## OUR MISSION

At Ashton and Bentley, we want people to feel proud.  
We want our customers to be proud to own our products.  
We want our employees proud to work for the company and we want our stakeholders proud to be associated with the brand.

## OUR CORE VALUES

### **Craftsmanship:**

Every Ashton and Bentley bath is a masterpiece, meticulously crafted by skilled artisans.

### **Innovation:**

We continually push the boundaries of design and technology to introduce groundbreaking products that redefine the bathing experience.

### **Elegance:**

Our designs are a harmonious blend of classic and contemporary styles, ensuring that each bath is a timeless addition to any bathroom.

### **Customer Satisfaction:**

We are dedicated to providing an unparalleled customer experience.

# MADE GREAT. IN BRITAIN.

At Ashton and Bentley, we are dedicated to creating extraordinary baths and basins that transform bathrooms into luxurious sanctuaries. We are not an automated, volume manufacturer. We are artisans and craftsmen, designing and creating luxurious baths and basins, beautifully finished by hand.

Our baths and basin may look effortlessly sleek, but they are meticulously crafted by skilled artisans in our British factory, taking up to 4 to 6 weeks for each bath.

We are a genuine business, genuinely manufacturing our luxury baths and basins in Britain, with genuine values. With a commitment to excellence, our team combines traditional techniques with cutting-edge technology to produce baths that are not only visually stunning but also highly functional.

# BESPOKE COLOUR FINISHES

Ashton & Bentley baths are simply stunning in white, but we also offer a vast selection of bespoke colour finishes to help you create a truly individual and high impact masterpiece.

With more different finishes than anyone else, we've got every design style covered. From sleek and modern to timeless elegance, our bespoke colour finishes ensure you a truly one of a kind Ashton & Bentley bath or basin.

## CORRERO COLOUR™

Compliment your Matt or Gloss White bath or basin interior with our exclusive high quality **exterior colour** finish implemented using our traditional craftsmen and the finest materials.

With 100s of colours from the RAL colour palette to select, Correro Colour™ adds an exclusive high quality paint finish to your bath or basin. Available in gloss or matt finish.

Alternately, choose any **Farrow & Ball®** eggshell paint to complete the colour scheme of your choice.

## FULL COLOUR

Elevate your bath or basin with **full interior and exterior colour** transformation to create a stunning statement. Choose from the RAL colour palette or any Farrow & Ball® eggshell paint.

Available for the vast majority of the Ashton & Bentley luxury baths and basins, and all the Biome and WhiteStone baths and basins - please refer to individual product pages in this brochure or call our Customer Service Team for more information.

## AUTHENTIC STONE FINISH

Tactile and beautiful, Ashton & Bentley's **authentic stone finish** transforms your bath or basin into a unique organic focal point. Infused with natural ground stone, and available in a range of shades inspired by the UK's stone heritage, the authentic stone finish truly resembles and feels like real stone.

Available for the vast majority of our Ashton & Bentley luxury baths and basins - please refer to individual product pages or call our Customer Service Team for more information.

The authentic stone finish is not available with Biome and WhiteStone baths and basins.

# CORRERO METALLIC™

Unique to Ashton & Bentley, we are able to offer **real metal finishes** on selected Ashton & Bentley luxury baths and basins. Using a Vac Metalising Process, VMP™, this process is the perfect alternative to heavier metal baths. The unique real metal surface results in a bath that is exceptionally strong and elegant, but without excessive weight.

Normally, metal baths suffer from tremendous heat loss but with the thermal properties of Correro™ that insulates rather than loses heat, you will be able to maintain water temperature longer.

Hand crafted, each Correro Metallic™ bath or basin is unique with a process involving rigorous polishing to create a one of a kind masterpiece. Colour variations and tiny dark metal flecks are part of the bath or basin's individual character and no two are ever the same.

A simple wax finish will keep your bath looking shiny and elegant.

# MOLTEN METAL

When it comes to creating an exceptional bathroom design, texture is key. Contrasting design elements introduce warmth, depth and character to create a truly individual and high impact interior design scheme.

Ashton & Bentley's Molten Metal finish is the ideal opportunity to introduce design layers to your bathroom. Available in brass, copper, platinum, nickel and bronze on the majority of Ashton & Bentley's luxury bath and basin range, the Molten Metal finish is the jewel in Ashton & Bentley's crown: breathtakingly beautiful, tactile and oh so opulent.

Artisan-crafted and created using only the highest quality metals, Ashton & Bentley's Molten Metal baths and basins make a perfect and unique centrepiece for your bathroom design. Using a contemporary twist of time-honoured casting techniques first used in Victorian foundries, the metal is cast onto the bath in liquid form and hand finished to create a unique surface with distinctive sheen and divine texture.

# CORRERO™

INSPIRED BY NATURE

Ashton & Bentley's luxury baths and basins are handmade from Correro™, our exclusive matrix of organic materials enriched with volcanic minerals sourced from quarries spanning the European continent.

Crafted using only the finest ingredients, our unique Correro™ recipe blends natural minerals with high performance resins to achieve the exquisite finish that we take great pride in. Baths and basins made from Correro™ are 'solid surface' - the same material is used all the way through. Solid surface allows casting with sharply defined details and tighter angles, to mimic the appearance of naturally occurring materials.

Made by hand, and with a high mineral content, every Correro™ product is individual. Minute flecks that naturally occur in the volcanic minerals are part of the individual character which makes each handmade bath or basin unique.

## Materials Benefits

Solid surface - same high quality material all the way through.

Strong, durable and hard wearing.

Renewable - chips or scratches can easily be repaired.

One of a kind - truly individual, with colour options including real metal finishes.

Thermal - preserves water heat up to 12 times longer than conventional materials.

25-year guarantee\* - the longevity of Correro™ is our assurance.

Resistant to chemicals and heat to 55°C.

Hygienic and more resistant to the growth of bacteria.

Non-porous and easy to clean.

Superior sound insulation and reduction of water noise.

Sustainable, refreshable, recyclable.

# CLASSIC RANGE

Made Great. In Britain.

## SWIVEL TOP WASTE

A swivel top waste available in chrome. Slotted version for baths with an integral overflow or unslotted version for baths without an overflow.

**Waste 6**

Unslotted WBT-UNS-ST-CP Chrome

**Waste 7**

Slotted WBT-UNS-ST-CP Chrome

## EASY CLEAN WASTE

A slotted click up waste suitable for baths with an integral overflow. Available in chrome or powder coated satin white, this waste comes with 'an easy clean trap' designed to collect debris and hair.

**Waste 8**

WBT-SLO-DT-CP Chrome  
WBT-SLO-DT-WH Satin White

# SMART WASTE UNIT

## WASTE 9

With Smart Waste, luxury bathing is water-saving and eco-friendly!

The Smart Waste Unit seamlessly blends sustainability and luxury without compromising the aesthetics of the bath.

Smart Waste's automatic overflow manages the volume of water in the bath, maintaining a precalibrated depth. Patented technology triggers the Smart Waste plug to open if the maximum water depth is reached. Once the water depth has reduced to the calibrated water depth, Smart Waste auto closes.

Increases in population and changes in lifestyle, together with climate change, mean that we need to design with the future in mind. While the bathroom may only take up a fraction of space in your home, it is often the area where water is used freely. Smart Waste is a fully functioning waste with water saving technology giving the customer reassurance against potentially expensive accidents, meeting water by-law regulations and minimising environmental impact, while still providing a contemporary modern designed bathroom.

All wastes are covered by a 2 year guarantee, subject to terms and conditions.

# BATH FEET

SUITABLE FOR THE AZZURE, ALESSA, CORINTHIAN AND ATHENA

# INNOVATION: A BRIGHT FUTURE

At Ashton & Bentley, we are dedicated to creating extraordinary baths and basins that transform bathrooms into luxurious sanctuaries. Our team of talented artisans, designers, and engineers work tirelessly to bring our vision to life, combining traditional craftsmanship with modern technology.

Since inception, our aim has always been to set the standard for luxury baths worldwide, inspiring a lifestyle of relaxation, comfort, and indulgence. Continuous investment in technology, new tooling, beautiful designs and bespoke finishes are all examples of our innovative approach.

As artisans and craftsmen, Ashton & Bentley is well positioned to set new industry standards. Our unique capabilities and innovative approach enables us to work with creative partners to deliver affordable, stunning spaces like no other.

Our future innovations include:

## **Advanced Materials:**

Introducing new, sustainable materials that offer enhanced durability and aesthetic appeal.

## **Smart Technology:**

Integrating cutting-edge technology to provide a more personalized and luxurious bathing experience.

## **Unique Designs:**

Unveiling bold, new designs that challenge conventional aesthetics and offer fresh, inspiring looks.

Ashton & Bentley is undoubtedly a market leader, delivering groundbreaking designs and materials that set new industry standards. Be inspired.

# Biome

**A collaboration between contemporary design and nature**

Crafted from Biolux®, our exclusive 100% sustainable eco-friendly alternative to natural stone, the Biome Range is created for the eco-conscious and curated for harmony; a selection of modern classic freestanding baths, complementing countertop basins, freestanding wash basins and shower trays.

The Biome Range is a leader in green luxury bathroom products. Manufactured from lightweight sustainable materials to diminish the transport carbon footprint; bactericidal, antifungal and virucidal to protect your family, as well as the environment. Unique seamless contemporary designs to define your vision and eco-ethical lifestyle.

Our designs are where engineering meets art - high impact visual statements of sculpted beauty created with Ashton & Bentley's signature quality and craftsmanship. The gentle silhouettes and organic curves of the Biome Range connect contemporary ergonomic design with nature while nurturing sanctuary and wellbeing.

Exuding classic contemporary style, the Biome Range is ergonomically designed to maximise comfort. The look and touch of Biolux® replicates the natural beauty and characteristics of stone, without the dedication to maintenance to keep it pristine in even the busiest of homes.

# ABOUT BIOLUX

Crafted from an eco-sustainable blend of inert mineral fillers, recycled PET and a corn-based resin, Biolux® is strong and durable and our greenest material yet. Awarded the Gold Certificate Green Guard by LEED®, Biolux® is a sustainable and 100% recyclable environmentally friendly alternative to natural stone bathroom products.

Warm and smooth to the touch, Biolux® is designed for the senses as much as for technical excellence. This warm and tactile material delivers the same benefits of Corro™, but with enhanced green credentials.

## Materials Benefits

Eco-friendly alternative to natural stone.

Strong & durable.

Preserves water heat up to 12 times longer than conventional materials.

Resistant to chemical products and heat to 55°C.

Non-porous with self-cleaning properties.

Acoustic reduction of water noise.

## BIOME BATH RANGE

Our eco-friendly alternative to natural stone.

# FLOREANA

# Biome

Available in 2 sizes, the Floreana embodies contemporary classic freestanding bath design. The gentle simplicity of its oval shape allows for either end bathing, creating a high impact visual statement and a deep bathing experience.

## WHITESTONE RANGE

Contemporary stone baths for all.

# WHITESTONE

Engineered in Europe by skilled craftsmen

Our WhiteStone Range brings beautifully designed contemporary stone freestanding baths to all. Precision engineered yet hand finished, WhiteStone merges the classic with the contemporary creating an exquisite and luxurious bathroom space.

The WhiteStone Range delivers the ultimate combination of comfort and style with distinct freestanding baths crafted from our exclusive mineral composite material Duracast™. Developed to enhance the remarkable characteristics of natural volcanic stone and fortified by the binding power of premium resin, Duracast™ is a sublime collaboration of technological innovation with the natural. Precision engineering exploits Duracast's™ outstanding compressive and tensile strength to honour the flawless freestanding bath designs of Ashton & Bentley.

Engineered in Europe, our WhiteStone range utilise a manufacturing process that uses 100% renewable energy and emits zero greenhouse emissions.

Mineral composite made from

## Materials Benefits

Warm to touch with high insulating properties to maintain water heat.

Strong & durable for high use bathrooms.

Enduring colour with no fade or yellowing.

Resistant to chemical products and heat to 70°C

Easy to clean thanks to the non-porous surface.

Superior sound insulation.

Sustainable & recyclable.

# CARE & MAINTENANCE

## **Correro™ Baths & Basins**

These simple maintenance guidelines will help you to preserve the distinctive look and feel of the Correro™ solid surface material.

### **General Cleaning**

Most dirt and residue can be removed with commercially available solid surface cleaners (such as Counter top Magic®) or soapy water / mild detergent. Do not use cleansers that contain acid or ammonia. Nor should you use caustic soda or strong bleaches. If you want a really good shine you can finish off with a fine automotive paint polish and then wax with traditional car wax. If you do this regularly you will get a finish that will look as good as new for many years to come.

Avoid exposing the surface to harsh chemicals such as paint removers/thinners, acetone based cleaners, stove/drain cleaners, etc. If these come in contact with the surface, quickly wash off with water, using the appropriate safety measures to avoid injury.

### **Cleaning White Gloss Finishes**

Following the general cleaning instructions above, lightly rub the Ashton & Bentley polishing compound onto the surface area. Then polish the surface with a soft cloth. Do not let the area dry out whilst polishing. Check for any missed areas and repeat the process if necessary. Finish the process by using an automotive paint wax.

### **Cleaning White Matt Finishes**

Following the general cleaning instructions above, then complete the process by rubbing the surface randomly with a fine grey or green Scotchbrite pad with water to achieve a matt finish.

### **Cleaning Metal & Paint Finishes**

Clean with a damp cloth using warm soapy water, or a soft detergent. Then dry with a soft cloth. Do not use solvent-based cleaners, or those containing hydrochloric acid or petroleum distillates. Do not use abrasive materials, chemicals, or cloths.

Avoid exposing the surface to harsh chemicals such as paint removers/thinners, acetone-based cleaners, stove/drain cleaners, etc. If these come in to contact with the surface, quickly rinse with water using the appropriate safety measures to avoid injury.

### **Removing Scratches**

Because Ashton & Bentley baths and basins are cast solid all the way through, the surfaces are completely renewable. You can remove a minor cut or scratch yourself. Please refer to our Product Care Guide which is available at [www.ashtonandbentley.co.uk](http://www.ashtonandbentley.co.uk).

Do not attempt to repair metal finishes yourself, due to the specialist nature of the material.

### **Water Temperature**

When filling your bath, always fill it with cold water first before adding hot water – Please note, the water from the hot water tap should not exceed 55°C. A sudden change in temperature runs the risk of causing thermal cycling effects. It is not a fault with the product, but a natural reaction when a high temperature hits a cold surface unexpectedly.

For more information, please refer to our Product Care Guide which is available at [www.ashtonandbentley.co.uk](http://www.ashtonandbentley.co.uk).

## Biome Baths & Basins

These simple maintenance guidelines will help you to preserve the Biome surface characteristics.

### General Cleaning

Most dirt and residue can be removed using soapy water or a common detergent. Gel detergents and abrasive products are particularly recommended in combination with a fine grey or green Scotchbrite pad.

Thoroughly rinse the surface with plenty of water after cleaning.

Avoid exposing the surface to harsh chemicals such as paint removers/thinners, acetone based cleaners, stove/drain cleaners, etc. If these come in contact with the surface, quickly wash off with water, using the appropriate safety measures to avoid injury.

### Removing Scratches

Small surface damage can be restored using a Scotchbrite scrub sponge combined with a common abrasive cleaner like CIF® and VIM®. Denatured ethyl alcohol can also be used, making sure the surface is then rinsed thoroughly. If the damage is still visible, smooth the area again using extra-fine sandpaper.

### Water Temperature

When filling your bath, always fill it with cold water first before adding hot water – Please note, the water from the hot water tap should not exceed 55°C. A sudden change in temperature runs the risk of causing thermal cycling effects. It is not a fault with the product, but a natural reaction when a high temperature hits a cold surface unexpectedly.

## WhiteStone Baths

These simple maintenance guidelines will help you maintain the surface beauty of your WhiteStone Bath.

### General Cleaning

Most dirt and residue can be removed using soapy water or common non-abrasive cleaning products. After each use the inner surface must be rinsed with water and cleaned with a cotton cloth. Avoid exposing the surface to harsh chemicals such as paint removers/thinners, acetone based cleaners, stove/drain cleaners, etc.

### Cleaning White Gloss Finishes

Following the general cleaning instructions above, we recommend using natural polishing wax, for example, based on beeswax, once per month.

### Cleaning White Matt Finishes

Following the general cleaning instructions above, we recommend using skin care oil once per month.

### Removing Scratches

You can remove small surface scratches yourself. Please refer to our WhiteStone Product Care Guide which is available at [www.ashtonandbentley.co.uk](http://www.ashtonandbentley.co.uk).

### Water Temperature

When filling your bath, always fill it with cold water first before adding hot water – Please note, the water from the hot water tap should not exceed 70°C. A sudden change in temperature runs the risk of causing thermal cycling effects. It is not a fault with the product, but a natural reaction when a high temperature hits a cold surface unexpectedly.

# FITTING INSTRUCTIONS

We strongly advise that you examine the bath upon delivery. The installation of the bath will be seen as an acceptance of quality and we will not accept any responsibility for any damage or imperfections once installed.

It is recommended that the bath is installed by a qualified plumber and must be placed on a completely flat solid surface and supported fully.

All instructions must be carried out otherwise this may invalidate your guarantee. We cannot accept responsibility for incorrect installations. We do not give any advice on DIY installations.

Full fitting instructions are available online at [www.ashtonandbentley.co.uk](http://www.ashtonandbentley.co.uk)

## **Drilling your Ashton & Bentley Bath**

We strongly recommend that any drilling requirements are requested prior to purchase.

Ashton and Bentley carry out a free of charge factory service for this work.

Tap holes can be drilled in the rim by third party installers, provided that they follow the instructions provided with the bath.

We do not recommend any drilling in the plinth or around the base of the bath is carried out by third party installers, as this could adversely affect the integrity of the bath. Any baths drilled in these areas by third party installers will not be covered under the guarantee.

## **Underfloor Heating**

**To reduce potential issues of thermal cycling effects, avoid the installation of heating elements or pipes directly below the bath. Any installation of this type will invalidate your guarantee.**

## **Colour Finish Disclaimer**

Colours change according to their surroundings. Variations can occur between paint batches, the properties of the surface being painted, finishes, light conditions and sheen levels.

All bespoke paint finishes are made to order and therefore cannot be returned or refunded.

# GUARANTEE

**To validate your guarantee you need to register the product online at:  
[www.ashtonandbentley.co.uk/guarantee](http://www.ashtonandbentley.co.uk/guarantee)**

Ashton & Bentley baths are guaranteed for **25 years for residential** use and **8 years for commercial or business use**. All bespoke colour finishes on Ashton & Bentley baths and basins are guaranteed for 2 years. This includes Corroero Metallic™ real metal finishes and Molten Metal. All wastes are covered by a 2 year guarantee, subject to terms and conditions.

We guarantee that from the date of purchase for the period of 25 years for residential customers the bath will be free from defects in materials and workmanship subject to the following conditions:-

- ◆ The guarantee will be activated and become valid only after you have submitted to us and we have accepted your online registration form which can be found on our website [www.ashtonandbentley.co.uk/guarantee](http://www.ashtonandbentley.co.uk/guarantee). You must do this within thirty days following installation and registration will not be accepted after that period.
- ◆ The guarantee only extends to baths and basins installed in residential accommodation for domestic use. It does not cover commercial or business use.
- ◆ The guarantee does not apply in the event of;
  - ◇ Any misuse or maltreatment of the bath.
  - ◇ Accidental damage or scratches to the bath.
  - ◇ Failure to follow the recommendations set out in our user manuals.
  - ◇ Any form of damage on installation.
  - ◇ Improper use or care.
  - ◇ Installations where the water temperature exceeds 55 degrees Celsius.
- ◆ The bath must have been installed by a plumber with appropriate accreditations and qualifications to install baths and accepted by us as such at the time of registration. That plumber must have followed the installation instructions supplied by us.
- ◆ The guarantee is limited to the replacement or (at our option) the repair of the bath, on one occasion only.
- ◆ The guarantee benefits the original purchaser of the product at its point of original installation only. It is not transferable either as to owner or location.

For advice on our waste kits and taps please call +44 (0)1952 45 45 46. Before installing the bath, please take a moment to read the fitting instructions.

Your guarantee will be invalidated if you do not follow our fitting instructions. The bath serial number is located beneath the bath. This sticker must not be removed or defaced otherwise it will invalidate the guarantee.

Except as provided herein, we make no guarantee of any kind, express or implied, with respect to the product, its merchantability, or fitness for a particular purpose. We shall not be responsible for any indirect, incidental, or consequential damages resulting from the delivery, installation, or use of the product.

# IMPORTANT INFORMATION

Ashton & Bentley pursues a policy of continual development and improvement and as such, product specifications may be changed without prior notice. All dimensions listed are only nominal. Being hand-finished, cast products, all dimensions are subject to a tolerance of +/- 3%.

- ◆ Ashton & Bentley reserve the right to change prices, designs and specification at anytime without notice.
- ◆ We strongly recommend that all our baths are installed by a qualified plumber.
- ◆ The contemporary baths are designed with no overflow unless stated.
- ◆ All intellectual property rights belong to Ashton & Bentley.

## **Bespoke Orders:**

- ◆ Bespoke, special, made to order products cannot be cancelled or returned.
- ◆ Once the bespoke order has been manufactured it must be delivered within 1 week.

## **Returns:**

We understand that occasionally circumstances change and a bath may no longer be required. In such cases we would accept the bath back on the following basis: -

- ◆ The customer pays the original delivery cost and the collection/return cost.\*
- ◆ If the original packaging is damaged, the customer pays for replacement packaging.
- ◆ The customer must ensure the item to be returned is securely packaged and secured to a pallet for safe transit.
- ◆ The returned item remains the customer's property until it arrives at Ashton & Bentley's Warehouse in a resaleable condition. If it is damaged, marked or scratched, we will not be credited.
- ◆ 20% restocking charge will apply. This will be waived if an alternative bath is purchased.

*\*Current prices will be confirmed by our Customer Service Team.*
